

Concentrates for the
Flower Connoisseur

Full Spectrum Concentrates

Single Origin - - Single Strain

Wild Rogue prides itself on preserving the full spectrum of the flower's profile when producing your concentrates. We take a **different approach** than most Processors in the market today. Our concentrates are made using a proprietary ultra-low "cold" process to deliver the full flavonoid, terpene, terpenoid and cannabinoid profile of your **favorite flower strains**.

Essential Oils vs. Distillates

Distillate or "clear" has its place for use in edibles, and in certain social situations.

If you **LOVE** flower - - like we do - - distillates just don't hit the mark like a full spectrum, craft style concentrate.

Wild Rogue Concentrates...

- Full spectrum "ENTOURAGE" effect
- **ZERO** non-cannabis derived additives
- **NO** carriers (PG, VG, PEG, MCT)
- Long lasting experience vs. distillate

Why Cold Processing Matters

Most CO2 Processors use **SUPERCritical** extraction (high pressure & temperature) to produce their concentrates.

Wild Rogue developed proprietary ultra-low "cold" processing techniques using **SUBCRITICAL** extraction (low pressure & temperature) to preserve the full flower experience - - in the convenience of a vape pen product.

Wild Rogue Concentrates...

- Highest **TERPENE** potency on the market today
- Cleanest CO2 concentrate - - **TRIPLE FILTERED**
- Tastes & acts like your favorite flower strains

Vaping Basics

💧 To get the best experience you need to use a quality **variable voltage** battery functioning between **3.0 to 3.5v**

💧 Remove rubber cap, attach cartridge to your variable voltage battery.

Do not over tighten!

💧 Take an initial 2-3 easy draws to ensure the cartridge functions and to experience the terpene rich flavors

💧 Take short, easy draws (5 second max)

💧 After - - store upright w/ temp: **65°-78°**

Return Policy

If you suspect that your cartridge is defective you can simply return the item(s) in question with proof of purchase within 7 days to the dispensary you purchased it. Each Dispensary's return policy can vary. Wild Rogue will provide a credit back to the dispensary through our wholesalers or directly.

Usage Tips & Tricks

Caution! - - Drawing longer than **5 seconds** repeatedly will overheat your oil, degrading the taste, and will gum up the coils making the cartridge malfunction

💧 **Cartridge doesn't fire**

- Check if battery is adequately charged
- Check connect point. If not connecting... **(return to retailer)**

💧 **Cartridge gurgles and you get oil on draw**

- Vacuum seal broken... **(return to retailer)**

💧 **Cartridge won't draw (it's stuck!)**

- Preheat oil cartridge using preheat function on battery or hold in your hand to warm.
- Gently insert straightened paper clip in bottom of cartridge to loosen ball bearing.
- If neither of these help... **(return to retailer)**
