**- BREEZE BOTANICALS -
Artisan Medical Marijuana Dispensaries
- Serving Southern Oregon -**

Breeze Botanicals, located at 315 Second Avenue in Gold Hill and 1526 Siskiyou Boulevard in Ashland, are artisan medical marijuana dispensaries embracing herbs cultivated and wildcrafted in Southern Oregon. Focusing on supporting local farmers, artists, and food producers, their beautiful herb, food, & art boutique is open to the public and enjoyed by everyone, with or without a medical marijuana card. Filled with local treats, handmade jewelry, herbal teas, tinctures, and more, the boutique is a joyful experience designed to help you find relief naturally.

In the dispensary, Breeze makes every effort to cater to the specific symptom needs and satisfaction of the Oregon herbal medicine patient in a safe, comfortable, professional environment. Breeze Botanicals works really hard on finding "The right herb, for the right symptom, for the right person" with a variety of medicinal herbs such as Oregon Grape, St. John's Wort, Hops, Chamomile, Echinacea, Burdock, Valerian, Motherwort, Yarrow, Cannabis, and other local herbs.

"Many people are interested in holistic healing through natural plant medicine and Breeze Botanicals is a unique source for a multitude of remedies that provide effective relief for many debilitating ailments," says Brie Malarkey, founder and owner of Breeze Botanicals.

Both stores feature over 40 different herbs, in addition to a large selection of medical marijuana options for various patient needs. By combining different herbs in conjunction with cannabis, Breeze Botanicals is leading the way with a wide array of natural herbal products and remedies that other dispensaries have been unable to match. "We really view ourselves as a compounding dispensary, working with patients and medical professionals to help find the right combination of herbs, potency, and delivery method to help patients address specific symptoms." said Malarkey.

Breeze Botanicals clearly identifies and labels each herb with a unique product card, making it easy for patients and caregivers to find what they need within the dispensary. The product card details the herbs and their healing properties, test results (where appropriate), and includes a color-coded ID. This color-coding quickly guides people in identifying all herbs in the store that could provide relief for medical needs, including herbs for those suffering from pain, loss of sleep, muscle tension and spasms, nausea and vomiting, agitation and stress, and loss of appetite. A limited number of people are allowed in the dispensary at a time, allowing the staff to work with patients and caregivers as individuals to get a better understanding of their specific needs for relief.
