

Sativa Hybrid

Clones

Organic Cultivation | \$20 per 4 inch pot
All clones in soil and 4-8 inches tall

Pink Panther

A sativa dominant hybrid that gives off a sweet pine and pear aroma. Having a heady high, it hits the consumer right between the eyes with a stimulating effect curbing the pain caused by migraines. Along with the pain relieving effects, it is very uplifting and great for socializing. THC levels can range between 18-24%. Flowering time is generally 8-12 weeks.

Ra Cannabis Sungrown 2017 Test Results - 18.31% THC | 1.40% Terpenes

Sour Diesel

A sativa dominant hybrid named after its pungent, diesel-like aroma. This strain is fast acting, energizing and offers an invigorating cerebral high. While some may use it to open up doors of creativity, others may use it to relieve anxiety and depression. This old school strain is believed to be a cross of Chemdawg 91 and Super Skunk. THC potency typically ranges from 19-24%. Flowering time is generally 10-12 weeks.

New York City Diesel

NYC Diesel (or Soma Sour Diesel) is a 60% sativa-dominant cross between Mexican and Afghani landraces. This strain provides strong cerebral effects that ease into a deep, full-body relaxation over time. NYC Diesel's happy, talkative qualities make this hybrid a good choice for social activities and many anxiety-prone consumers praise it for its paranoia-free effects. Flowering time is generally 10-12 weeks.

Dragon's Breath

Dragon's Breath is a sativa-dominant hybrid cross between the two legendary strains, Jack Herer and Northern Lights. Its balanced, clear-headed effects are ushered in by a distinctive spicy aroma that hints at this hybrid's Haze ancestor. Some patients may find Dragon's Breath particularly helpful in burning off pain, depression, and anxiety throughout the day.

Indica Hybrid

Clones

Organic Cultivation | \$20 per 4 inch pot
All clones in soil and 4-8 inches tall

Grand Daddy Purple

This indica cross of Big Bud and Purple Urkle has a fruity terpene profile of grape and berry. Getting its fruity aroma from its parent Purple Urkle, Big Bud passed on its large, compact bud structure creating a cross with big beautiful purple nugs covered in crystal resin - you can't help but appreciate the beauty of the bud! Hitting you with a cerebral rush that ends in a deep sense of peace and relaxation, this strain is perfect for killing the effects of chronic pain, appetite loss, muscle spasm and insomnia. THC potency typically range between 17%-27%. Flowering time is generally 8-9 weeks.

Headband

60% Indica | 40% Sativa Headband is a classic standby, effective and easy to find almost anywhere. It's available on both the legal and black markets, but it's most popular on the West Coast. This strain is a cross of two venerable parents, OG Kush and Sour Diesel, making for a 40:60 sativa/indica ratio. Headband is named after its famed cerebral effects, as it creates a sensation of pressure across the forehead similar to a headband. THC levels can reach higher than 17-24%, putting this on the top shelf of potent strains. Flowering time is generally 7-9 weeks.

Ra Cannabis Sungrown 2018 Test Results - 20.73% THC | 1.31% Terpenes

Ogre

This beast of a cannabis strain stands as an indica-dominant strain that sprouts colorful, purple nugs that nicely contrast the white trichome blanket. The flowers smell highly skunky laced with bitter citrus, and the smoke from Ogre tastes like lemon juice with a dash of earth.

Ra Cannabis Sungrown 2018 Test Results - 22.93% THC | 1.47% Terpenes

Purple Hindu Kush

A cross between Hindu Kush and Purple Afghani, Purple Hindu Kush is almost pure indica and offers the kind of high one would expect from its lineage: deep relaxation along with pronounced pain relief. Featuring dense lavender flowers with bright orange pistils and a thick blanket of trichomes, as well as a pungent sour grape and citrus flavor, PHK will be sure to please indica lovers everywhere.
