

PO BOX 10913 Eugene, OR 97440

September 10, 2019

To all our Vendors and Customers,

We at Willamette Valley Alchemy want to address the recent news about vaping illness in the cannabis industry.

Being Oregon's first recreational processor, Willamette Valley Alchemy has set standards for high quality extracts. We test with only OLCC licensed cannabis laboratories that have met the Oregon Environmental Laboratory Accreditation Program (ORELAP). WVA always meets and exceeds all required state testing for pesticides, solvents and potency.

WVA feels strongly about providing high-quality clean products that create a positive experience. You can feel good knowing WVA Cartridges and PAX Pods contain absolutely NO additives NO fillers and NO distillate. Our product's ingredients list is simple: 100% cannabis extract. We have never used additives (that includes Vitamin E) in our products. We only use C-Cell and Q-Cell glass cartridges (that utilize ceramic and quartz heating elements) to ensure quality throughout the supply chain. WVA cartridges are a true cannabis experience from the top producers in Oregon.

We thank you for your continued support while we navigate this new industry.

Sincerely,

Paul Sherman

Brice Sherman

Adam Chase

Three handwritten signatures in black ink are stacked vertically. The top signature is for Paul Sherman, the middle for Brice Sherman, and the bottom for Adam Chase. The signatures are fluid and cursive.
